

# 2<sup>nd</sup> Century Enterprise Transformation

Kim Miller

Supply Chain Director

# Organizational Transformation, Cultural Transformation, Business Transformation, Digital Transformation.....

# The Future

# Second Century Systems (2CES)

## Achieving Maximum Value from end-to-end integration

2nd Century

### Value Chain

Supply Chain

Manufacturing

Engineering

Product Support

Finance

Sales &amp; Marketing

Human Resources

### Expected Outcomes

- Provides end-to-end process integration on One Boeing platform
- Enables consistency of processes across the organization
- Reduces redundant work and limits reconciliation between numerous systems
- Enables consistent master data within the realm of the ERP
- Improves transparency and decision making

# Aspiration for 2nd Century Enterprise Systems

Implement **integrated systems and processes** to **enable 2nd century competitiveness**

- Enterprise architecture and capabilities, commonality, and adopting industry advances

**This will allow us to:**

- Deliver **global-ready and adaptive processes and systems** for the extended enterprise
- Unleash data and information across the enterprise to **transform our decision making**
- Leverage the **Internet of Things (IoT)** capabilities with directed investments
- Drive **productivity and growth** with mobile-capable information and industry leading analytic capabilities

# Enterprise Resource Planning (ERP)

Software architecture that facilitates the flow of information among different functions

## Reduce inventory holding and waste costs

Reduce stockouts and obsolescence of inventory through improved forecasting, consolidating SKUs, etc.

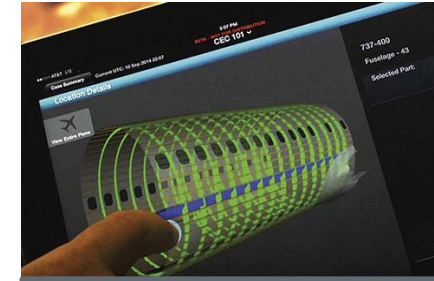

## Reduce warehousing expense

Through network optimization (dependent on transition to single ERP system)

## Reduce procurement costs

Integrated view in Boeing's supply base

## Reduce labor expense

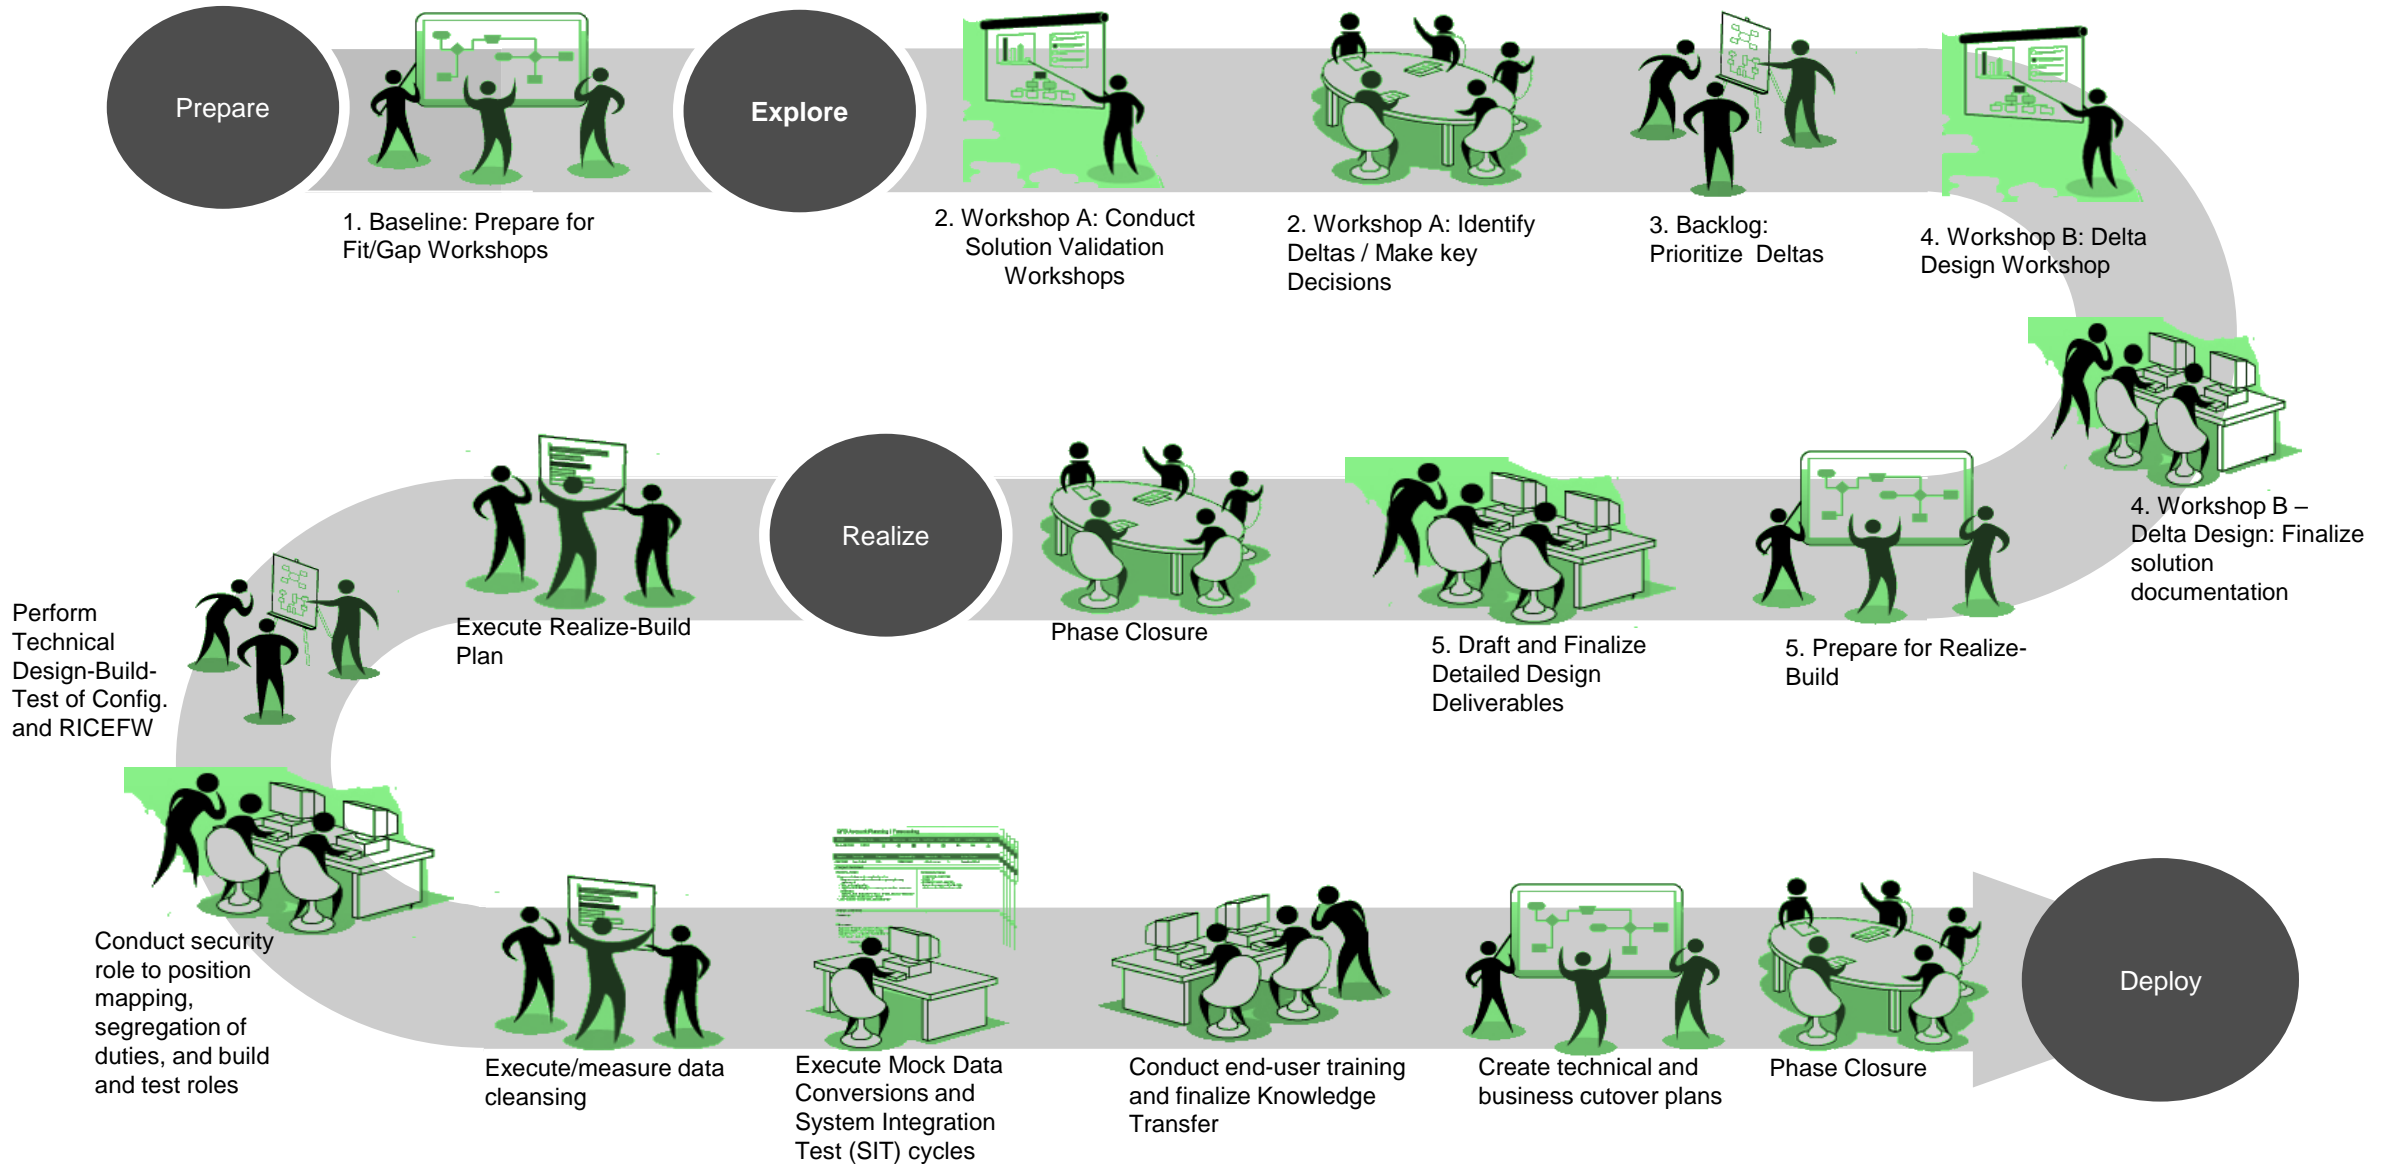

Reduction in hours reconciling and recreating data. Streamlined systems to support purchasing

## Reduce finance labor costs

Integrated system reduces data management, governance, and duplicative efforts

# 2CES ERP P2P – Our Journey

# Transformational Leadership

A style of leadership in which a leader identifies

- The need for change
- Creates a vision to guide the change through inspiration
- Executes the change with commitment
- Creating change in people and culture that will lead to innovation and growth

# Questions?
