

AEROSPACE
& DEFENSE SUPPLIER SUMMIT
SEATTLE
APRIL 11 - 13, 2022
SEATTLE, USA

WORKSHOP PROGRAM

TUESDAY - APRIL 12, 2022

Introduction to Performance Review Institute – Nadcap

10:30am - 11:00am, Tuesday - April 12th

Ethan Akins, Senior Business Development Manager at **Performance Review Institute – Nadcap**

- What is the Nadcap Program?
- How to get started?
- How to prepare for an audit and working in eAuditNet.

The Path to Clean Aviation

11:00am - 12:00am, Tuesday – April 12th

Amanda Simpson, Vice President for Research and Technology at **Airbus Americas**

A deep dive into the future of clean aviation and how Airbus' sustainability goals will help the world achieve a greener tomorrow.

A roadmap for a smart and sustainable manufacturing industry – Pole EMC2

12:00pm - 12:30pm, Tuesday – April 12th

Laurent Manach, Managing Director at **EMC2**

The health crisis we have come through since 2020 has deeply impacted our societies and economies, and the manufacturing industry has been particularly affected. These challenges come on top of the grave warnings repeated by the IPCC concerning global warming, while the recent Russian invasion of Ukraine and the western response has further compounded industrial supply-chain challenges. In this context, it is imperative that the manufacturing sector adapts to these new realities and adopts a smart and sustainable industrial model.

Microelectronics Supply Chain Risk

02:30pm - 03:00pm, Tuesday – April 12th

Cameron Carey, Enterprise Semiconductor Risk Management Leader at **Boeing**
Bethany Irwin, Supply Chain Strategy Microelectronics Data Analytics at Boeing
Rod Dormier, Boeing Strategy & Semiconductor Risk Management at Boeing

The current state of the microelectronics segment within the aerospace and defense supply chain. What Boeing has learned thru discussions with our suppliers, electronics distributors, and industry groups about the causes, duration, and actions that can be taken to mitigate risk.

Enable Maximum Sustainability

03:00pm - 03:30pm, Tuesday – April 12th

Max Schultes, Chief Technology Officer of **RAMPF Composite Solutions**

Enable Maximum Sustainability- develop revolutionary new products quickly and scale fast with new composite materials and engineering technologies.

The fastest path to first time quality

03:30pm - 04:00pm, Tuesday – April 12th

John Abrahamian, Executive VP/ Technical Director at **Shainin - The Red X Company**

Solve complex problems faster. Create a sustainable problem-solving program & culture. When quality problems have hidden root causes, the appropriate corrective actions can be elusive. Brainstorming root causes followed by trial-and-error testing is inefficient and ineffective. A convergent approach which progressively eliminates large groups of causes and isolate the critical factor is a superior method. We can show you how.

Invest in Toulouse and the Occitanie region, at the Heart of the Aerospace Valley and the European smart transportation < eco system >

05:00pm - 05:30pm, Tuesday – April 12th

Carole Crevel, Project Manager, Export - United States and Arab Countries at **AD'OCC**

AD'OCC, Invest & Trade in Occitanie, is the regional Development agency of the Occitanie Region. AD'OCC offers free and confidential consulting for your development, corporate location or partnership projects in Southern France. The Occitanie region, Toulouse area, is the European leader for civil aeronautics. The region is home to 3 leading aircraft manufacturers: Airbus (world HQ), ATR (world HQ) and Daher.
